### **BASIS OF ACCOUNTING**

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund financial statements. Revenues are recorded when earned, and expenses are recorded when the liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collected within the current year or soon enough thereafter to pay liabilities of the current year. For this purpose, the Town considers revenues to be available if they are collected within 60 days of the current year.

Taxes, intergovernmental revenues, and interest associated with the current year are considered to be susceptible to accrual and so have been recognized as revenues of the current year. All other revenues are considered measurable and available only when cash is received by the Town.

Expenditures generally are recorded when a liability is incurred, as under accrual accounting.

## **BUDGET PLANNING AND REVIEW PROCESS**

Step 1: The budget is continually being reviewed and evaluated. During the budget preparation and even after adoption, the budget is being monitored for timeline efficiencies, priority effectiveness, and relevance to changing circumstances.

Step 2: The structured budget process begins in July. Following the acceptance of the previous year's audit and actual numbers realized, the updated fund balances and rollover items are presented to the Board of Trustees. This presentation will also include additional items the staff have determined as supplemental needs for the current budget year. The updated fund balances, rollover items, and supplemental budget requests are presented to the Board of Trustees in late August and may be adopted as the Supplemental Budget or Revised Budget.

Step 3: The budget process continues with trend studies, inflation forecasting, and growth projections. These studies, along with standard needs for increases in services provided to the community and operating supply needs form the foundation for the upcoming budget year. The foundation is then built on with staff input, capital improvement and replacement plan implementation and long-range fund balance projection reviews. This process involves meetings with each department, at which time the department directors present their plans for personnel and equipment needs, along with their projections on operational service and supply needs. Each departments numbers are entered into the budget worksheet to determine how they affect the budget as a whole. A draft budget is produced, which is a preliminary form of the upcoming year budget.

Step 4: The draft budget is presented to the Board of Trustees in early October. Board input and suggestions are then added to the budget, along with ongoing analysis of the accuracy and efficiency of the budget-in-process. Over the next month, the Town Administrator and Director of Finance continue to work with the department directors to make any adjustments in the preliminary budget numbers. During this time, special interest is taken in the long-range plan, usually consisting of a five-year forecast for operational and capital expenditures. The fund balances are continually observed to ensure healthy balances will be upheld for the future. The end result of this step is the proposed budget, which is considered to be in the pre-final stage.

Step 5: The proposed budget is presented to the Board of Trustees in early November. The proposed budget is the result of the studies, analysis, staff and board input, discussions, long range evaluations, and months of thought. The Board has an opportunity to ask questions regarding items on the proposed budget and recommend additional changes. If changes are recommended, the Town Administration may modify the budget as necessary. Typically, at this point, there are few changes to be made. The final budget is ready.

Step 6: The final budget is presented to the Board of Trustees for adoption in early December. This is also the time any fee schedule changes are adopted and the mill levy for the coming year is adopted.

## **BUDGET CONSIDERATIONS**

### Salary and Benefits

- A salary survey was completed in late 2021. It was completed by an external professional source. The results were used to determine competitive salaries for 2022 and 2023. The overall increase in salaries, including new positions, was estimated to be an increase of 5% from 2022.
- The insurance benefits are reviewed annually. It was determined the current providers offered the best rates and services, with an estimated 7% rate increase.
- No additional monetary benefits were considered.

### Fees

- The fee schedule is reviewed each year.
- Cost recovery is the primary means of determining accurate fees.
- The majority of changes were made for recreation center fees. Fees were increased to capture expenses that were not being covered for these services and assigned to new recreation programs.

### Capital Improvements

- A replacement schedule is used to determine capital expenditures for vehicles, computers, and general equipment.
- Master plans are used to determine capital expenditures for infrastructure, water and wastewater facility improvements, and expansion needs.

### Assumptions

- The community has more than doubled population in the last 7 years. It is assumed the population will continue to grow at a steady, but slightly slower rate.
- The current infrastructure will sustain the current population and is sufficient to sustain population growth for approximately 5 years. It is assumed the budget will need to reflect healthy fund balances to prepare for infrastructure expansions within the next 5 years.
- Inflation has risen at a steady rate in Northern Colorado with the average of 2.72% over the past 20 years and 7.3% in 2022 alone. It is assumed the inflation will continue to rise at this steady rate. A 5% per year increase is assumed when determining the 5-year budget estimates and fund balances.

## BUDGET PLANNING CALENDAR

The budget, although reviewed all year long, is primarily developed beginning in August and ending with adoption in December. The Town of Berthoud operates on a fiscal year equal to the calendar year. We begin by setting the budget planning calendar.

## **BUDGET MESSAGE**

The Town developed the Budget for 2023 after a diligent review process. The revenues and expenses of the current year and the last 3 years were reviewed to determine an expected starting point for 2023. Each department presented their proposed changes and requests. The combination of:

- 1) current and past year revenues, expenses, and trends,
- 2) proposed needs and changes from each department,
- 3) development and population projections, and
- 4) inflation trends, along with

(5) strategic goals set by the Board of Trustees, provided us with the tools necessary to have productive discussions, make accurate calculations and ultimately produce a quality budget.

The Schedule of Fees was changed from 2022. The changes were solely in recreation fees. These fee changes were based on a cost recovery analysis and review, overall inflation expectations, and market rate comparison. There were also fees added for new activities and programs relating to the recreation center.

In 2023, we will be increasing our full-time staff by 2 positions in our Water Department. Our fund allocations are focused on multiple street and road projects, sidewalk improvements, park development, park land acquisition, water plant improvements, and wastewater system improvements.

We believe the budget for 2023 accurately and conservatively reflects our revenue and expense projections. Our goal is to remain financial healthy while providing quality services to citizens and meeting personnel needs. The Town staff appreciates the support from the Town Board and department heads for their participation and cooperation throughout the budget process. If any budget issues arise throughout the year, they will be discussed and addressed.
